**PLAY PUMPS INTERNATIONAL**

It is my pleasure and privilege to receive your congratulatory letter and the message it carries. I am humbled by such a huge donation we received as if you were in our hearts.

When we asked for this donation, water was our number one problem. Now that we have water, learners can drink, nutrition programme is carried out with ease, our classrooms and toilets are clean and we have just planted new trees and planning to start with vegetable gardens soon.

Looking at the multi-purpose the Round About Play Pump serve, we always marvel at the wisdom behind this. Our learners pump while having fun and once the tank is full, water goes back to the hole for storage purpose.

It will be my pleasure to continue interacting with you in future. May the Spirit of Lawrance Prifti; though on the other side, live long! The Spirit that thought life to be so precious and discovered that it springs from water.

Thanks very much and be rest assured that life will never be the same at Bakone primary school.

May God bless you

Yours truly

Principal
