**TO: ROUND ABOUT WATER SOLUTION  
(RAYMOND)**

**RE: APPRECIATION FOR SERVICES RENDERED**

*The above mentioned school will like to pass its words of appreciation to Round About Water Solution for their positive contribution towards the education of our learners and community of Mkhize Village (Driefontein).*

*The school is happy that they have water throughout the year at any time of the day. The school had previously experienced many problems due to shortage of water supply (i.e unable to cook for learners, unable to have a garden and unable to have flushing toilets), due to your help now those problems are a thing of the past.*

*Today the school had seen its enrolment rapidly increasing from an enrollment of about 550 to 730 learners.*

*Your contribution has helped not only the education of the pupils and the promoting of the school infrastructure but it has helped advance lifestyles of the community members who always faces difficulties in the shortage of water supply offered by the municipality in our area. Also the play pump has lead to a healthy and safe environment as the water generated there is clean and pure.*

*Hoping for a long term relationship.*

Shabalala M.G (Principal)
