The manager  
Round about play pump  
South Africa

Dear Sir/madam

Thank you for giving us a bore hole at our school. At school we do not need to go out and fetch water as we have this bore hole. This bore-hole helps us because we get healthy water. The kids from the lower classes enjoy playing with the round about and it helps because the more they play. the more we get water.

There are some things we need at our school like computers, principals, office, desks and chairs. We will be happy to learn how to use computers. We also need ceiling because it is cold in winter.

Yours sincerely

Papama Makathangeni
